About Me

B.Sc. (Hons.) Software Engineering graduate with hands-on experience in both software development and Quality Assurance, spanning manual and automation testing. Skilled in building and testing full-stack, microservices-based applications, with strong exposure to functional, performance, and automated testing across web and mobile platforms. Passionate about building a long-term career in Quality Engineering, combining a developer's understanding of systems with a QA mindset to deliver reliable, high-quality software.

Skills

Programming Languages: Node JS, Express JS, Spring Boot, React JS, Next.js, Angular, React Native, JavaScript, TypeScript, Java, C, HTML/CSS

Automation Tools: JMeter, Selenium, TestNG, REST Assured, Playwright

API Tools: Insomnia, Postman

Test Case Management & Bug Reporting: TestRail, Jira

Databases: MySQL, PostgreSQL, Oracle, MongoDB

Data Streaming & Messaging: Kafka

Cloud & CI/CD: AWS, Jenkins

Version Control: GitHub, Bitbucket

Operating Systems & IDEs: Windows, Ubuntu, Fedora, Visual Studio, MATLAB, IntelliJ

Soft Skills: Project Management, Team Player, Fast Learner, Time Management, Leadership, Effective Communication, Critical Thinking

Experience

Intern Quality Assurance Engineer, Cloud Solutions International(CSI) Feb 2026 – Aug 2026

- Performed end-to-end testing of a data migration tool and newly developed web application, identifying critical migration defects before production and reducing the risk of production issues.
- Identified and investigated API response and data-handling defects, contributing to improved usability, reliability, and operational efficiency across SRE and Management platforms.
- Detected API duplication issues and collaborated with developers to improve API consistency, eliminate redundant API calls, and enhance system maintainability and performance.
- Initiated mobile automation from scratch by extending the organization's existing UI automation framework, establishing a reusable foundation for automating multiple mobile applications.
- Analyzed limitations in the existing automation framework and enhanced its architecture to support UI, Mobile, and API automation through a common, reusable framework.
- Developed and maintained mobile automation for Patient Beta App, Doctor App, and Julia Nurse Assistant App using Java, Appium, Selenium, TestNG, and the organization's automation framework.
- Investigated mobile application APK compatibility and launch-blocking issues across Android emulators and physical devices, helping improve APK stability and compatibility for subsequent releases.
- Conducted RD on AI-powered Voice-to-Text automation using AI Agents and Large Language Models (LLMs), and prepared technical documentation outlining implementation approaches and future AI automation possibilities.

Intern Software Engineer, Information Systems Associates (ISA) – Air Arabia Oct 2024 – Apr 2025

- Contributed to the AeroLINE Crew Management platform, working with microservices supporting crew-related business operations.
- Developed and enhanced application features, including push notifications and reporting modules, with improvements to UI and overall usability.

- Refactored legacy code and followed established coding standards and software development best practices to improve maintainability.
- Designed and optimized SQL queries to support efficient data retrieval and application performance.
- Developed a microservices-based Garage Management Application as part of a group project, supporting vehicle repair management across multiple branches.
- Implemented functionality for service booking, repair completion-time tracking, and multi-vehicle bookings under a single user.
- Worked with Spring Boot, React.js, Angular, REST APIs, PostgreSQL, Kafka, gRPC, JWT, Docker, Bitbucket, and Jira.

Certifications

Software testing fundamentals – Udemey

Java – Certified by Coursera

Version Control – Certified by Coursera

Projects

Restaurant Review Mobile App / Web Application Sep 2025

- Developed a mobile application that lets users browse restaurants with advanced search and filters, write reviews, and rate restaurants, using Elasticsearch-powered queries for fast, relevant results; implemented pagination, rating filters, and nearby search.
- Technologies Used: React Native, Angular, Spring Boot, Keycloak, Elasticsearch, Pagination, Docker, Cache

Todo Application Nov 2025

- Built a full-stack To-Do application with automated CI/CD using Jenkins, integrated SonarQube for code quality checks, containerized with Docker, and deployed on AWS using ECR and ECS for scalable, efficient delivery.
- Technologies Used: Spring Boot, React, REST API, MySQL, Keycloak, Jenkins, SonarQube, AWS

StudioXpress Application Dec 2025

- Developed a full-stack Photo Studio application for booking packages, ordering custom prints, and uploading images; implemented secure payments, order tracking, and an admin dashboard with analytics.
- Technologies Used: React JS, Node JS, Express JS, MySQL, JWT

Performance Evaluation of Spring Boot Applications Using Ehcache and Caffeine Oct 2025 – Apr 2025

- Conducted a case study comparing caching strategies (Ehcache and Caffeine) against direct database access in Spring Boot applications, analyzing improvements in response time, throughput, memory usage, and overall system efficiency using JMeter, VisualVM, and Apache Benchmark.

Education

University of Kelaniya, B.Sc.(Hons.) in Software Engineering Sep 2022 – Feb 2026

- Current GPA: 3.39/4.00

J/ Vaddu Hindu College, G.C.E. Advanced Level (Physical Science) Oct 2020

- Combined Maths: A | Physics: B | Chemistry: B

Honors & Awards

CYPHER 3.0 Hackathon – 1st Runner-up, **Organized by IEEE, IEEE WIE, WIE KDU** 2025

Hackathon 6.0 – 3rd Place, **Organized by University of Jaffna** 2024
